

DuraVision Newsletter May – June 2014

MEET DUANE FINCH

Welcome to my first Duravision newsletter. Firstly let me introduce myself. My name is Duane Finch and I was born in Hamilton, NZ. I lived in Tauranga from 18 months old and moved to Medicine Hat, Alberta, Canada in 1977 at the age of 7. Everyone asks me why move from the beach to a city 1000km (700 miles) from the ocean. Ask Mum I continue to say. In saying that Canada is a beautiful country and I thoroughly enjoyed growing up there and playing the game I love, Ice Hockey. I have made many journeys over the Pacific Ocean between these two great countries and have decided at this stage of our lives to stay here in NZ. I am married to a wonderful lady named Teresa and I have two pleasant boys Cody 10yrs and Justin 13 months old. Yes, quite the age gap you might ask, but wee Justin was an IVF baby that has taken us 7 years to finally be blessed with him. We have settled in the lovely suburb of Tauranga, called Papamoa. Wow back to the beach. Enough about my personal life now how about my working career.

I have worked in Retail for the last 20 odd years working for companies like Canadian Tire in Canada as well as The Warehouse here in New Zealand. My last position was working for a New Zealand owned and operated company out of Thames named Browns Appliances where I was the store manager. They will be happy I have put them on my first newsletter. I have now been with Bennett Mirrors for about 12 days while I type this out, today is day 13. This is completely different than my last job but a great challenge lies ahead, and I'm trying to catch up on the Bennett Mirror Jarga that hits me every day, hopefully I will get it all one day.

I look forward to having contact with you all in the next few months either by email or skype.

An exciting product that we are getting involved in, is the Cobra Simulation. Are you a race car enthusiast or a pilot? You will want to check this out. Go to www.cobrasimulation.com and have a look. Alexander from Cobra Simulation was here at the beginning of May checking out our facilities and taking Ben and myself through the ins and outs of the Cobra Simulation. We are a satellite store so go and check out the press release.

Check out the Feature Product below, Container Inspection Mirrors. We have been getting numerous enquiries over the last few months for shipping container inspection mirrors and have noticed that a lot of countries we deal with are tightening up their border control and biosecurity measures. We have found our 230mm (9") is ideal for 6-side container inspections, airplane cargo, or even underneath imported vehicles. We have recently sent out a flyer to our local Approved Transitional Facilities and Licensed Customs Control Areas and expect to see some more activity in this area. See below our sample brochure you can download for the US market.

Well thats about it for my first newsletter. But first I must thank the team here at Bennett Mirrors for being so friendly and patient while I go through this learning curve. Keep an eye out for next newsletter. Rumour has it there was some interesting beer drinking going on by Alastair and Gordon for Gordon's last day with us here.

All the best, Duane
